

Deep Reinforcement Learning

Model-based reinforcement learning

Prof. Dr. Sebastian Peitz

Chair of Safe Autonomous Systems, TU Dortmund

Summer term 2026

Content

Content

- Model-based RL
 - Model-based rollouts
 - Dyna-style algorithms
- Learning a model
 - Dreamer architecture
 - Uncertainty estimation?
 - Learned ensembles
- Planning at decision time
 - MCTS
 - AlphaZero

The discrete case: Monte-Carlo Tree Search
